

Data Centre Solutions

Row-Cooling Mechanism

Product Description

The Briticom® Row-Cooling Mechanism provides complete cooling for high-density data centres, especially those with uneven heat distribution due to high power and varying load depending on peak and off-peak periods.

Features & Benefits

- Can be configured as required
- High quality materials – Cold-Rolled Steel
- Built-in dual power supply for better power reliability
- Castors to allow movement to various locations
- High efficiency compressor
- Condensate pump to remove water from the unit to ensure continuous operation

Applications

- LAN and WAN Applications
- Enterprise and Business
- Education
- Government

Technical Specifications

Nominal Capacity	5.2kw	10.3kw
Input Voltage	208-230V, 1Ph, 60Hz 220V, 1Ph, 50Hz	208-230V, 3Ph, 60Hz 400V, 3Ph, 50Hz
Refrigerant	R410a	
Compressor	Fixed as standard (Inverter as optional)	
Fan	AC fan as standard (EC fan as optional)	
Unit Dimension (D x W x H)	300mm x 1050mm x 2000mm	600mm x 1100mm x 2000mm
Weight	170kg	220kg
Controls	Multi-line LCD Control display	
Communication	RS-485 Modbus
