Aerial Cable Joint Closure for  
Copper Cable – Model 01

**Product Description**

Briticom® Aerial Cable Joint Closure for Copper Cable is breathable and suitable for straight, butt and drop splices of non-pressurized communications cables.

The Briticom® Antenna Closure is a one-piece antenna closure easily used in the installation and maintenance of overhead telecommunications cables. One-piece construction allows full access to splices, without removing the closure or cable bonding.

The closure consists of a closure body, end seals and other essential components. The closure body is a lightweight, double-walled, molded plastic housing. It is resistant to bad weather and ultraviolet rays. The durable housing won't crack or break, even in the harshest environments.

- Features & Benefits**
- Easy to install, re-use and dismantle.
  - Free opening/closing with latches.
  - Up to 3 cable inlets and outlets.
  - Made from durable, rugged material.

**Technical Specifications**

|                      |                                         |
|----------------------|-----------------------------------------|
| Model Number         | 01                                      |
| Type                 | Copper Cable Joint Closure              |
| Material             | HDPE + Stainless Steel                  |
| Application          | Aerial                                  |
| Capacity             | 100~500 Pairs                           |
| Joint Type           | Connection and branching of cable joint |
| Process              | Injection molding                       |
| Atmospheric pressure | 80~106Mpa                               |
