

Technical Specifications

Product Material	High-strength steel or galvanised steel
Function	Tensioning aerial suspension wires
Span	Short & Medium
Measurements	3-8mm
Weight	30g
Part Number	CT 38 03 50

Product Description

Boost the durability and reliability of your steel wire installations with Briticom® Galvanized Steel Wire Thimble. Engineered to provide reinforced support, this thimble ensures secure anchoring and protects steel wire strands from wear in a variety of applications.

Features & Benefits

- **Galvanised Steel Construction:** Provides excellent corrosion resistance, ensuring long-lasting performance in outdoor environments.
- **Reinforced Design:** Engineered to strengthen and shield steel wire strands from abrasion and wear.
- **Versatile Use:** Perfect for construction, rigging, marine, and other applications requiring reliable wire anchoring.

Applications

- Aerial cabling
- Telecommunications infrastructure
- Construction and building projects
- Outdoor and industrial installations
