

Product Description

Briticom® access covers are primarily used to cover Telecom networks, but also for road signs, lighting, and other uses. They are modular, allowing for large openings that make intervention on underground equipment an easy task. These access covers are the most economical solution for chamber access.

Features

- Briticom and Airtel branding
- Hydro-soluble paint or galvanised steel finish
- Locking system
- Hinge
- Gasket
- OSTR A opening
- EN124 D400

Applications

- Cable management
