

Fibre Management

Fibre Fusion Splice
Protection Sleeve – Standard

Product Description

Briticom® heat shrink protective sleeves are used to reinforce spliced fibres.

Features & Benefits

- Keep optical transmission performance of optical fibre
- Increases strength and protection of spliced fibres
- Moisture resistant
- Made from cross-linked polyolefin, heat-shrink tubing and with a stainless reinforced steel rod

Applications

- Fibre management

Technical Specifications

Outer Diameter (±0.1mm)	1.4, 2.4, 2.6 or 3.0 (Various sizes)
Working Temperature	-55°C ~ 100°C
Tensile Strength	18MPa
Max. Elongation	700%
Density	0.94g/cm³
Dielectric Strength	25KV/mm
Volume Resistance	1015Ω.cm

Example Part Number	
Description	Part Number
Heat Shrink Protection Sleeve 61mm 2.4mm Diameter Transparent	HSPS60GRY2.4
