Lantern Tensioner 2 Eyes

Product Description

The Briticom® Lantern Tensioner, commonly referred to as a Turnbuckle, is an essential tool for accurately tensioning aerial suspension wires with ease. This versatile device allows for simple adjustment and maintenance of wire tension, ensuring superior stability and support in various applications, including telecommunications, construction, and outdoor installations.

Features & Benefits

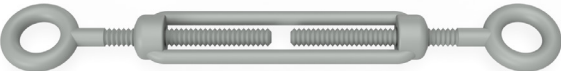

- **Aerial Suspension:** Engineered specifically for tensioning aerial suspension wires, ensuring stability and reliability.
- **Turnbuckle Design:** Incorporates a turnbuckle mechanism for effortless tightening and adjustment, making installation and maintenance more convenient.
- **Durable Construction:** Built from sturdy materials to endure outdoor conditions and provide long-lasting performance.

Applications

- Aerial cabling
- Telecommunications infrastructure
- Construction and building projects
- Outdoor and industrial installations

Technical Specifications

Product Material	High-strength steel or galvanised steel
Function	Tensioning aerial suspension wires
Bearing Tensile	1000 daN
Weight	530g
Part Number	LT 2E 1000 53 25
