

Locked RJ45 Blanks & Key

Briticom® Secure & Locked helps to protect against unauthorised access to a network or system, as well as preventing unintentional or malicious damage to ports. It can also act as a visual cue, showing inactive or disconnected ports. It can quickly block open network ports and prevent users from connecting cables, devices or inserting foreign objects without permission. The lock secures itself to the RJ45 port and can be removed with the attached key again.

- Physically blocks access to an RJ45 port
- Quick and easy to use
- Prevent damage to RJ45 ports
- Visual security deterrent
- Ideal to use in schools, offices and public sector environments
- Content: 10x locks
