

Fibre Optic Cleaning Tools & Test Equipment

Optical Fibre Identifier (OFI)

Product Description

Briticom® offers the Optical Fibre Identifier (OFI), which will detect any optical signal being transmitted without stressing or damaging the fibre or the connectors.

Features & Benefits

- Easy-to-use: one-key operation
- Efficiently identifies the traffic direction and frequency tone with audible warning
- Displays the core power of the fibres
- Low bending loss and highly efficient output
- Easy-to-replace adaptors

Applications

- Fibre optic inspection and testing

Technical Specifications

Wavelength Range	800-1700nm
Optical Power	-50~+0dBm
Detector Type	Φ1mm InGaAs 2pcs
Adapter Type	Φ0.25 (Applicable for Bare Fibre) Φ0.9, Φ2.0, Φ3.0
Signal Direction	Left & Right LED
Dimension (mm)	195(l) * 30(w) * 27(h)
Operating Temp	-10~+60°C
Signal Frequency	270Hz, 1kHz, 2kHz
Power Supply	One 9V Alkaline battery
Signal Type	CW, 270Hz±5%, 1kHz±5%, 2kHz±5%
Storage Temp	-25~+70°C
Weight (g)	235

Example Part Number	
Description	Part Number
Optical Fibre Identifier Through Cable Jacket - Model 1	OFICJM1BLK
