Pole Mounted Curved Suspension
Clamp for Figure-8 Drop Cable

Technical Specifications

Type	curved suspension clamp
suitable cable dia.	4-5mm/5-9mm (double size grooves)
Material	carbon steel
application	for hanging figure-8 cable
Breaking load	8kn

Product Description

The Briticom® suspension clamp enables anchor figure-8 drop cables with steel messenger on telecom access networks where spans do not exceed 50 meters.

The unique and patented design of this suspension clamp provides a multi-purpose solution meeting the suspension needs on wooden, steel, concrete, or composite poles.

It consists of UV-resistant thermoplastic jaws, reinforced with two galvanized steel plates and secured by two galvanized steel bolts.

Thanks to its straight and slightly curved grooves as well as to its reversible system, this clamp can be installed on figure-8 cables presenting messenger diameters of 4 to 9mm.

Features & Benefits

- Pole Mounted Suspension Clamp for Figure-8 Drop Cable
- Used to anchor fig-8 drop cable in telecom access networks
- Suitable for drop cable with messenger wire 4mm to 9mm
- Pole mounted by pole band, bolts, or bracket hanging
- Simple structure, flexible application

Applications

- Aerial cabling
