

Cable Management

PVC Dado Trunking with Compartment

Product Description

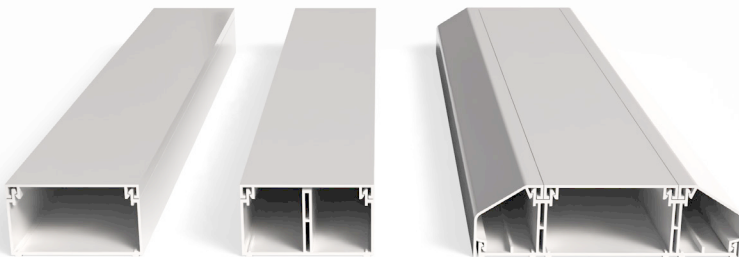

Briticom PVC Dado Trunking provides a safe, efficient, and durable solution for cable management. Made from high-quality, non-conductive PVC, it offers excellent insulation and protection. Its compartmental design keeps cables organized, while features like flame resistance, moisture protection, and chemical durability ensure long-term reliability. Easy to install and compatible with both square and rounded switch and socket boxes, it's ideal for clean, professional installations.

Features & Benefits

- **Non-Conductive:** Provides excellent insulation, capable of withstanding up to 25KV, ensuring system safety.
- **Robust Design:** Engineered for protection against dust and rodent intrusion.
- **Durable and Safe:** Trunking offers high strength and flexibility; it's flame-retardant, moisture-resistant, alkaline-resistant, and resistant to aging.
- **Easy Installation:** Lightweight and simple to cut, transport, bend, and handle. Can be easily connected using solvent cement or threaded joints with no leakage.
- **Versatile Mini-Trunking:** Designed to seamlessly match both square and rounded surface-mounted switches and socket boxes.

Applications

- Data centres
- Telecommunication networks
- LAN

Technical Specifications

Material:	Made of rigid PVC
Certificates:	CE(Test Standard: EN50085) : RoHS
Flammability Rating:	FV-0 : FH-1
Struction	Made up of Duct bottom and cover
Application	Used in stage, electric apparatus, air conditioning or indoors
Work Temperature:	-40°C to 65°C
Available Color:	Ivory, snow white, bluish white, other colours are available
