

Technical Specifications

Product Material	SS202
Function	1/2" 202 Stainless Steel Strapping Band
Length	50 meters
Width	12.7mm
Thickness	0.76mm
Weight	5.4kg
Part Number	CMT 202 SS 50 5

Product Description

Briticom® Stainless steel banding strapping, also known as stainless steel banding tape, is a durable and corrosion-resistant option for securing items in various environments. Unlike regular steel banding, which can rust in high-humidity conditions, stainless steel banding is suitable for both indoor and outdoor use where it may be exposed to moisture for extended periods.

The edges of stainless steel banding straps can be processed into either slit or round types. Slit edges tend to be sharp, while round edges are smoother and safer to handle. Briticom® ensures that all their banding products come with round edges for safe and easy installation.

Features & Benefits

- SS202 is a chromium-nickel-manganese alloyed stainless steel .
- Stainless steel banding strap provides very good corrosion resistance.
- Our banding strap has round and smooth edges which is for easy handling

Applications

- Aerial cabling
- Telecommunications infrastructure
- Construction and building projects
- Outdoor and industrial installations
